

STEPS TO SECURE YOUR MOBILE PHONE

1

CREATE A STRONG PASSCODE

Use facial recognition, touch id, and use at least a 6 digit passcode.

2

CONTROL PERSONAL ASSISTANTS

Disable access to Siri, Ok Google and Bixby from the lock screen and control third party shortcuts or apps

3

ENABLE PHONE TRACKING

Enable find my phone or device tracking in the event your device is lost or stolen.

4

USE A VPN

Set up a VPN and use DNS over HTTPS such as cloudflare's DNS servers to protect your browsing
